Indian Institute of Technology, Hyderabad Hyderabad, India
Bachelor of Technology in Materials Science and Metallurgical Engineering *Oct. 2022 – Present*

Mozampur HSSB High School Malda, India
High School *Jul. 2020 – Apr. 2022*

EXPERIENCE

Frontend Developer at PicaPool

Indian Institute of Technology, Hyderabad *Hyderabad, India*

- Worked as a frontend developer, and built two apps PicaPool and PicaPool Partner.
- Worked on new implementation of the main website.

PROJECTS

URL Shrink | *Source Code* | *Go/Gin, ReactJs, PostgreSQL*

- A web application designed to shrink large URLs and track the number of clicks on the generated short URLs.
- Developed using Go/Gin as backend framework, PostgreSQL as database and ReactJS for frontend.
- Cookie-based Google authentication for secure user access. And a subdomain utilization for efficient redirection.

Hackathon Portal | *hackathon.bhaskaraa45.me* | *Go/Gin, ReactJs, PostgreSQL, Supertokens*

- Developed a comprehensive portal for conducting a hackathon organized by E-Cell, IIT Hyderabad in collaboration with NPCI. The portal features both participant and admin interfaces to facilitate smooth event management.
- Utilized Next.js and Tailwind CSS for the frontend development. and Go-Gin framework and PostgreSQL for backend and database respectively.Implemented secure authentication using Supertokens.
